SUMMARY

Experienced web developer with passion for System Admin and DevOps. Exploring new opportunities to continue learning and expanding my skillset. Currently obsessed with Elixir, Elm and Phoenix.

TECHNICAL SKILLS

Languages: Elixir, PHP, Javascript, Bash, Ruby & Python

Libraries & Frameworks: Phoenix, NodeJS, Flask, Wordpress, Laravel, React & Ruby on Rails

Database Systems: MySQL, Postgres and MongoDB

Markups & Formats: HTML5, CSS3, & JSON

Version Control & Configuration Management: Git, Docker, Vagrant, Proxmox, AWS, Gulp, Grunt and Webpack

Testing: PhantomJS, CasperJS, Jasmine & Karma

EXPERIENCE

Backend Developer/DevOps Drive Digital // November 2015 - Present

Build, maintain and deploy Wordpress websites.

Provide estimates, plan for custom websites and maintenance work.

Optimize Centos, Ubuntu servers and code-base for performance and security.

Duties:

- Built and maintain many custom and legacy Wordpress code-bases
- Provide efficient maintenance hours, harden clients servers and remove malware
- Tweak and average at 90+ for Google page speed scores
- Help maintain and streamline development workflow
- Maintain proper backups and clients DB as well as assets on a monthly basis

Full Stack Web Developer Act - Autism Community Training // August 2015 - November 2015

Created an API built with Laravel and MySQL to feed JSON to custom built Wordpress plugins.

Automated front end testing with Karma, Jasmine and PhantomJS.

Deployed the app to Amazon AWS.

Duties:

- Wrote documentation about app/roadblocks for other developers
- Wrote clean commented code
- Ported over other DB heavy resources to reduce load on VPS
- Deployed app to Amazon EC2, RDS, S3 and followed best practices to lock down security

VOLUNTEER

HTML500

- Volunteered during the #HTML500 2016 to mentor attendees learning HTML, JS & CSS

EDUCATION

Lighthouse Labs Vancouver, BC // 2015

Lighthouse Labs is an accelerated coding bootcamp that teaches full-stack web development in an immersive environment. Ruby, Ruby on Rails, HTML/CSS, Javascript, jQuery, NodeJS & SQL.
